

## Hydravlon-1 Ltd. offers the TECPOS range of professional hydraulic tools

For all professionals working on the repair, maintenance or construction of heavy machinery and equipment - If you are looking for a specialized tool from a proven manufacturer and at affordable prices, Hydravlon-1 Ltd. offers the TECPOS range of professional hydraulic tools.

They are the reliable tool every specialist needs, because they are designed to withstand prolonged work, even in the toughest industrial conditions. The superior functionality of the TECPOS tools has been achieved thanks to improvements in technical parameters, durability and ergonomic design, while maintaining excellent value for money.

The range of hydraulic jacks, pumps and special tools offers high pressures from 700 to 2500 bar and includes:

- manual, electric and pneumatic pumps and powerpacks;
- low profile, standard and hollow jacks;
- tools for cutting, perforating and bending metal parts with different profiles (beams, sheet metal, pipes, rods, etc.);
- devices for cutting and crimping of electric cables and ropes;
- tools for dismantling bearings and cogwheels, for separation and alignment of flanges, etc.

For additional information and prices of hydraulic pumps, tools and cylinders offered by Hydravlon-1 Ltd., you can contact their sales department, which will be delighted to assist in all matters.
