

23 May 2019, MTG Dolphin PLC

Name giving ceremony of 2'300 m³ TSHD „LESSE“

On the 23rd of May 2019, the third consecutive trailing hopper dredger, building No.803/CO1295, for Dutch Dredging received her name „Lesse“ at an official ceremony in MTG Dolphin Shipyard, Varna.

The vessel is an improved version of the previously built „Albatros“ and „Mahury“ and is designed to maintain sea and inland waterways, as well as to perform land reclamation. The hopper dredger is equipped with the latest electronic system for positioning, sounding and execution of dredging work. With a dredging depth of 30 m below the waterline and a hopper capacity of 2 300 m³, the LESSE is extremely efficient and can be deployed worldwide. Special attention is given to the reduction of the operational costs, which is achieved by designing the ship for a maximum uptime, by applying more wear resistant materials and by deploying maintenance free equipment on board.
